

*The peaceful revolution in berlin has began!*

We are the 99% of the population versus its 1%, where the 1% together control most of the resources which we could use. In the 1% we can find the bankers, the politicians and the owners of medias and huge properties. They **talk in secret to exploit** us (but also themselves) and we **talk publicly** and in assemblies, because we find the assemblies a useful tool for reaching consensus and because we learn that the 1% will always try to split us - the 99%.

Any law, such as those based on "war on terror", shall never be consider legitimized, when acting against democratic citizens, where democratic citizens shall always have at least these 3 freedoms:

freedom of speech (in)

freedom of association (for those having)

freedom to move

No Leadership nowhere

everzbodz is a individuum !
